

Job description

Job title	Computer Systems Validation Specialist
Division	Engineering
Career Level	2
Responsible to	Computer Systems Validation Manager

INTRODUCTION

Porton Biopharma Ltd, Porton Down is a medium sized life-science company performing a range development and manufacturing roles for biopharmaceuticals. This also includes all associated support functions from logistics through to engineering, quality control / quality assurance, regulatory affairs and management. The Company manufactures two licensed products, Erwinase[®] and the UK's Anthrax Vaccine as well as providing R&D services for product development.

The Validation team comprises of approximately 30 specialists on a permanent or contractual basis. The scope of Validation activities for the team covers general re-qualification of equipment, facilities and utilities with an experienced knowledge base of Computer System Validation, Cleaning Validation, Process Validation and the delivery of capital equipment and systems into beneficial use.

JOB SUMMARY

This role within the Validation team is necessary to manage and execute validation activities associated with the cGxP compliance of computerised and software systems, ensuring that they are appropriately qualified and fit for operational use.

The role will ensure that the commercial risks associated with disaster recovery and data life cycle compatibility are addressed for each computer system guaranteeing long term availability of business-critical systems and data.

This role is a hands-on position and requires the post holder to be able balance multiple project-based activities, coordinating the generation, review and execution of validation protocols with the relevant stake-holders.

In addition, this role will have an input into CAPEX projects where there is a significant computerised / software content, ensuring that systems have been appropriately designed and qualified to ensure effective and cGMP compliant operational use.

To lead and execute CSV validation activities of computerised systems and associated equipment in accordance with current regulatory requirements.

To minimize business risk associated with the processing and storage of electronic documentation ensuring continuity over the equipment and product's life cycle.

Communication and key working relationships

Internal

- Validation CSV Manager
- Validation Project Team Leader
- Validation Technologists / Technical Specialists
- Unit Managers,
- Operations
- Project Managers
- Quality
- Internal Auditors
- GMP Engineering

External

- Equipment / System Suppliers / Vendors
- External Customers and Regulatory Auditors

MAIN DUTIES AND RESPONSIBILITIES

- Take the lead in computer system validation and compliance, manage and deliver specific Validation Projects according to the business priorities, including work scheduling and supervision of junior members of staff.
- Comfortable working alone or within the matrix management system.
- Continuous improvement of validation systems and procedures to ensure efficiency and best practice within the industry and to stay abreast of changing regulatory expectations.
- Write, review and approve validation documentation including protocols and reports and manage the timely closure of any discrepancies or non-conformities.
- Providing a reliable service to our internal customers to ensure that timescales are met, and work is carried out to meet expectations.
- Maintaining the ongoing compliant status of computer systems associated with equipment, facilities and utilities by involvement of the scheduling of activities.
- Communicating validation activities with our internal and external customers and working with them to resolve problems and conflicts.
- In line with overall responsibilities, perform additional tasks assigned by the line manager.
- Undertake all work in accordance with Code of Safety Practice and site Quality Policies.

Other

The above is only an outline of the tasks, responsibilities and outcomes required of the role. You will carry out any other duties as may reasonably be required by the directorate. The job description and person specification may be reviewed on an ongoing basis in accordance with the changing needs of the organisation.

Professional development

You should pursue a programme of continuous professional development in accordance with any relevant professional registration or statutory requirements, while maintaining appropriate awareness of service provider requirements.

You should adhere to PBL values and behaviors:

- Passion
- Respect
- Integrity
- Diligence
- Excellence in Execution (E²)
